

Communicating Science: How to Connect Science to the Public

Katherine Courage

Award-winning science journalist, author, and communicator
Director of Communications, College of Natural Sciences

College of Natural Sciences
Education & Outreach Center

How can you best communicate science? Award-winning science writer Katherine Courage will shed light on how the public learns about science today—from traditional media to social media and beyond. Courage has worked as an editor for Scientific American and written for The New York Times, Wired, Popular Science and others, as well as authored two books. She will share what she has learned from her years in the field—and share ways to inspire the most interest!

You are invited to the College of Natural Sciences
Education & Outreach Center's Fall Event*!

(*In collaboration with the CSU Chapter of Sigma Xi)

When:

Tuesday, October 11, 2016

4:00 - 5:30 p.m.

Refreshments!
